In case of eye contact

After eye contact: rinse out with plenty of water. Remove contact lenses.

If swallowed

If swallowed: give water to drink (two glasses at most). Seek medical advice immediately. In exceptional cases only, if medical care is not available within one hour, induce vomiting (only in persons who are wide awake and fully conscious), administer activated charcoal (20 - 40 g in a 10% slurry) and consult a doctor as quickly as possible.

prolonged or repeated exposure can cause:, Damage to the heart., Yohimbine produces competitive alphaadrenergic blockade and blocks 5- hydroxytryptamine receptors. It penetrates the CNS readily producing a complex pattern of responses which include antidiuresis, elevations of blood pressure and heart rate, increased motor activity, irritability and tremor, sweating, nausea, and vomiting. It is a selective inhibitor of alpha-2 adrenergic receptors enhancing neural release of norepinephrine., To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.
